- Creative Ability
- Python | React | JS | HTML | CSS | TS | Flask | Node.js

EDUCATION

Python Full Stack

John Bryce | 2023-2024

Haifa, Israel

ABOUT ME

I'm a Full Stack Web Developer based in Israel. I specialize in creating robust and user-friendly websites with a seamless user experience. My interests span the entire development stack, from crafting engaging front-end interfaces to building efficient back-end systems.

As an independent freelancer and avid blogger, I enjoy experimenting with new technologies and taking on challenging projects. I work well both independently and as part of a team, adapting to different workflows and collaboration styles. When I'm not coding, you can find me playing video games or immersed in a good book. I believe that with passion and dedication, anything can be transformed into art. Feel free to connect with me via social media!

EXPERIENCE

I don't have formal work experience yet, I'm eager to gain hands-on experience and prove my skills in a professional setting.

PROJECTS

"BabyBot - World"

Developed by me personally
Currently under development
